

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Newly retired, after spending several years working with his brother to manufacture their crane business into an market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

All through their journey, John reacquainted himself with past business acquaintances along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial market for a product that could quickly and securely lift individuals in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a joint venture with two friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty staff, they created and sold the first JLG aerial work platform. The company incorporates some of the simple design essentials of that original lift into current designs.

JLG forklifts have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the business proudly continues to expand itself into various marketplaces worldwide and develops new products to ensure customers are capable of being more efficient and perform in the workplace within a safer atmosphere.
